

VEGETATIVE ROOFING COMPONENTS

ROOT BARRIERS

Seam Tape

Product #

3210

Root Barrier Seam Tape is an elastomeric single-sided adhesive tape used to seal the seams of our root barriers. Specific to this product, it:

- has a black polymer backing and a very **sturdy adhesive** that is specifically formulated to provide maximum performance in a green roof environment
- has a **poly release liner** which provides ease of installation
- helps assure that aggressive roots stay where they belong
- reduces the amount of root barrier overlap required

LEED Credits available for:
• Materials & Resources (MR)

Tiered pricing based on product quantity

100 LF per Roll
6 Rolls per Case (600 LF)

TECHNICAL DATA

Materials:

- Recycled LLDPE

Material Thickness:

- 0.025"

Roll Dimensions (W x L):

- 4" x 100'

Roll Weight:

- 0.15 lbs. / ft²

Tensile Strength:

- 4,500 lbs. / in²

Peel Adhesion:

- 20 lbs. / in

Elongation:

- 700%

Vegetated Roofing Use:

- To seal seams of root barriers

Installation Requirements:

- Root barrier surface must be dry and free from dust or any substance that could interfere with the adhesion of the tape
